

# PtaaS versus Traditional Consultancies

Pentests start in days, not weeks. You receive a notification as soon as a vulnerability is found. Manual security testing supports DevOps sprints and helps to prevent breaches without slowing down releases. It's not a dream – it's Pentest as a Service. See what makes it stand out from traditional approaches.

## Traditional Consultancies

VS

## Pentest as a Service

Static, encrypted results and reporting (e.g. PDF)

DELIVERY

Real-time results and reporting via a cloud platform

Tests can start in 4-7 weeks

START TIME

Tests can start in 24 hours

A limited pool of in-house pentesters, constrained by location

TALENT

A large, diverse group of freelance pentesters, available to work remotely

Daily or custom pricing

PRICING

Flexible SaaS model

## Traditional Consultancies

VS

## Pentest as a Service

No integrations or technology-enabled collaboration workflows

**COLLABORATION  
& INTEGRATIONS**

Technology workflows improve interactions between teams

No analytics from previous tests, difficult to review

**ANALYTICS**

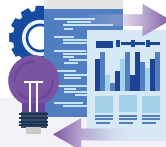

Analytics and insights from pentest data

Manual knowledge transfer from one test to another

**DATA  
REUSABILITY**

Platform retains knowledge of past and ongoing tests

Charged extra

**RETESTING**

Included, unlimited

Rigid pentest process, does not scale up or down

**CUSTOMIZATION**

Pentest program follows customer's needs
