

# The Cobalt Offensive Security Platform

The Cobalt Platform centralizes offensive security testing, enabling faster pentests, seamless collaboration, and efficient remediation.

Enterprises face challenges coordinating pentests, prioritizing vulnerabilities, and managing remediation across applications, networks, cloud, and infrastructure. Without a streamlined, user-friendly way to integrate findings into existing workflows, it's cumbersome to share findings, validate remediations, prevent recurring issues, and maintain a strong security posture.

The Cobalt Offensive Security Platform centralizes access to security services from our team of expert pentesters, making it easier to find and fix vulnerabilities across your environments. By enabling faster pentest launches, real-time collaboration with testers, continuous scanning, and seamless integration with remediation workflows, Cobalt helps your team identify critical issues and accelerate risk mitigation.

## Benefits of the Cobalt Platform

<b>Ease of Use</b>	Start a pentest in as little as 24 hours, view findings and reports, and manage your offensive security program.
<b>Findings Aggregation</b>	Triage vulnerabilities across all security tests in one place.
<b>Real Time Collaboration with Testers</b>	Immediately act on critical or high severity findings while the test is ongoing, and remediate vulnerabilities before the final pentest report.
<b>Pentest Planning</b>	Proactively plan your annual pentest schedule, resources, and budget to ensure full coverage across your environment.
<b>Integrations</b>	Push critical vulnerability information into the tools your teams use every day to speed up remediation.
<b>Automated Scanning: DAST &amp; ASM</b>	Continuously identify new vulnerabilities with automated scanning of your applications and networks.

“The platform is leagues beyond what anyone else was offering. Pentest as a Service is much more flexible and caters to our organization’s needs in a much more direct way that allows us to pentest new releases as they come out, and also on an annual cadence, our old releases and everything that we need to maintain security for.”

KOLBY FISHER,  
CYBER SECURITY ANALYST,  
PROGNYN

“The platform allows us to deploy faster pentests, and real-time collaboration with security experts. We use Cobalt’s service every quarter. We have also integrated our CI/CD pipeline with Cobalt’s PTaaS model. The platform is also user-friendly to manage vulnerability findings seamlessly. Platform support is exceptional as usual.”

PRASHANT N,  
SECURITY ENGINEER

# The Power of Cobalt

Cobalt provides offensive security solutions for programmatic risk reduction by combining technology with human expertise to deliver unmatched speed and scale to reduce risk.

## SPEED

Launch with confidence. Cobalt delivers fast, on-demand testing so you can get your ideas to market quickly without sacrificing security.

- 24 Hours to Start a Pentest
- 7 Day SLA for Retesting

## SCALE

Get the efficiency of automation with the precision of experts. Broad, continuous testing across all assets; enabled by technology, optimized for growth.

- 200+ Pentests Live Everyday
- 10k+ Critical or High Severity Vulnerabilities Discovered by Cobalt

## EXPERTISE

Protect your business against evolving threats with expert-led assessments that fortify your business.

- Pioneers of pentesting as a service
- 500+ Pentesters in the Cobalt Core
- 5000+ Pentests per year
- 11 Years of Pentesting Experience on Average
- 5% Acceptance Rate Into the Cobalt Core

### Application Security

- Web Application & API Pentest
- Mobile Application Pentest
- Desktop Application Pentest
- AI & LLM Application Pentest
- Secure Code Review
- Dynamic Application Security Testing (DAST)

### Network & Cloud Pentesting

- Internal Network Pentest
- External Network Pentest
- Cloud Configuration Review
- Cloud Pentest
- Attack Surface Management (ASM)

### Infosec & SOC Security

- Red Teaming
- Digital Risk Assessment

## Human-led, Tech-enabled Offensive Security Testing

Cobalt's offensive security services – including pentesting, red teaming, and more – cover a wide range of application, network, cloud, and security testing. We offer manual, structured, in-depth assessments along with automated, continuous scanning to discover complex vulnerabilities before they can be exploited.

## Cobalt Core

The Cobalt Core is our community of 500+ rigorously vetted pentesters. These seasoned ethical hackers average 11 years of pentesting experience, and hold certifications such as CEH, CISSP, OSCP, and CREST. Acting as an extension of your security team, the Cobalt Core uses manual and automated offensive security tactics to uncover critical vulnerabilities through pentesting, red teaming, code reviews, and more. Reduce risk, unblock sales and new releases, and enhance your overall security posture with expert services from Cobalt.
